Procurement & Supply Chain

For the people who buy, source and supply — from
spend to strategy

Everything gets bought. Little gets sourced.

Procurement sits on the numbers, the contracts and the supplier history — and still spends its weeks processing orders instead of shaping spend. The work is about turning transactions into sourcing decisions, and supplier relationships into managed risk.

Spend data exists in three systems; the spend picture exists nowhere.

The critical supplier everyone depends on has no risk assessment.

Contracts get signed — then filed, and forgotten until renewal.

Maverick buying is everyone's problem, so it is no one's.

WHAT THIS WORK SHOULD DELIVER

Spend you can steer

One spend picture — and sourcing priorities that follow from it.

Supplier risk, managed

Dependencies and risks known before they become incidents.

Contracts that work

Structures and obligations visible through the lifetime, not just at signing.

Commercial discipline

Procurement controls that hold in practice, not just in policy.

From processing purchases to steering spend, suppliers and risk.

Five practical capabilities, grounded in the discipline model.

#	CAPABILITY	WHAT IT PRODUCES
1	Spend & sourcing analysis	Spend patterns analyzed and sourcing priorities proposed — grounded in your own data.
2	Supplier risk & dependency review	Supplier structures, dependencies and risks assessed and made visible.
3	Process & control review	Purchase-to-pay flows and procurement controls reviewed for gaps and inefficiencies.
4	Contract-structure review	Contract structures and obligations examined against practice.
5	Maturity assessment	An honest read of procurement and supply-chain maturity, with priorities.

IN PRACTICE — SIDE BY SIDE IN YOUR WEEK

Before the sourcing decision — it structures the category picture: spend, suppliers, dependencies and options.

When a supplier wobbles — it maps your exposure — contracts, volumes, alternatives — for the decision that follows.

In the process review — it walks the purchase-to-pay flow and names the control gaps and friction points.

WHAT IT NEEDS FROM YOU

Your procurement policies and contract structures, registered spend and supplier extracts — system and period named — and the process landscape as it is. Supplier confidentiality holds by design: other bidders' material never enters the model, and evaluation support never becomes the award decision — humans award.

What it stands on — and where to begin.

PROFESSIONAL FOUNDATION

Procurement and supply-chain management · category management and sourcing models · spend analysis · supplier evaluation, segmentation and risk management · contract-structure review · approval-flow analysis · logistics and inventory principles

STANDARDS & REGULATORY LANDSCAPE

ISO 20400 · category-management and contract-governance frameworks · Public Procurement Act where applicable · contract law · anti-corruption and competition-law awareness · GDPR where supplier data is involved

A curated selection. Standards apply at your organization's adoption level. Regulatory references reflect the Norwegian baseline — adapted per market and sector, and verified against current sources in every engagement.

WORK WITH SYNTROPIO ON —

Four examples in ascending ambition — from a question in the meeting to a governed rhythm across the organization.

ASK	"Where is our spend concentrated — and which contracts does it actually sit on?"
PRODUCE	"Prepare the tender package — requirements, evaluation model and the award documentation."
SCHEDULE	"Run scheduled supplier reviews — performance, risk signals and expiring agreements flagged early."
CONSOLIDATE	"Consolidate spend, contracts and supplier data into one category picture with negotiation priorities."

A discipline of Syntropio, the Operating System for Organizational Intelligence — activated as your organization's own instance, grounded in your sources, governed within agreed boundaries and reviewed by qualified people.

BRING ONE REAL CHALLENGE

Bring one real category, supplier or process challenge. We'll explore how Syntropio can help your team see the spend, manage the risk and strengthen the commercial discipline.
